

# SCHEDULE D

## PURPA QF Uniform Statewide Contract

Itasca-Mantrap Cooperative Electrical Association uses the Uniform Statewide Contract for Cogeneration and Small Power Production Facilities under Minnesota Rules 7835.9910.

Itasca-Mantrap has added the following to their current net metering rate schedule.

### Distributed Generation (DG) Grid Access Charge

1. For all distributed generation systems interconnected after June 1, 2016, the cooperative will bill the member a Distributed Generation (DG) Grid Access Charge. The DG Grid Access Charge will be based on the cooperative's fixed costs not already paid for by the customer. The cooperative will use its year end Form 7 to develop the DG Grid Access Charge on an annual basis.
2. The Distributed Generation (DG) Grid Access Charge is \$2.65/KW of nameplate capacity of the DG system above the first 3.5KW of nameplate capacity for residential interconnected systems, and \$3.52/KW of nameplate capacity of the DG system above the first 3.5KW for commercial interconnected systems. The DG Grid Access Charge will not exceed the cooperative's fixed costs to serve the member based on the year end Form 7 report and there will be a cap of \$23/month for each residential DG system and \$81/month for each commercial DG system.
3. The cooperative is given the authority to recover the costs of service through MN State Statute 2168.164, Subd. 3: Purchases; small facilities.
